EVALUATION SYSTEM:

There will be two partial exams that will have a value of 50% of the final grade. The remaining 50% will be obtained from three papers, attendance, active participation in class, in addition to oral presentation of the work in group:

- Partial Exam I: 25%. Minimum grade to pass 5/10 (five out of 10). Susceptible of recovery by a complementary exam, as long as the student has correctly developed the rest of the continuous evaluation.
- Partial Exam II: 25%. Minimum grade to pass 5/10 (five out of 10). Susceptible of recovery by means of a complementary examination, as long as the student has correctly developed the rest of the continuous evaluation.
- Activity A: 10%. Mandatory individual work. The student must do it and deliver it on the stipulated date in order to be able to prove the correct development of the continuous evaluation.
- Activity B: 10%. Mandatory individual work. The student must do it and deliver it on the stipulated date in order to be able to prove the correct development of the continuous evaluation.
- Work in group: 30%.
 - Mandatory work. The students will have to do it and make the different deliveries on the stipulated dates, for its correct monitoring by the teacher and for the correct monitoring of the subject itself and its continuous evaluation by the students. This part of the development will have a value of 20%
 - Mandatory oral exposure. The students can make it, as long as they have made the partial deliveries of the work in group. This part will have a value of 10%.
- The teacher will take into account the evolution, progress, proactivity, effort and development of the continuous evaluation of each student; besides taking into account the attendance and active participation. Special consideration to the contributions made by the students will be given.

To be able to average the final qualification, it is essential to obtain a minimum rate of 5 in the two partial, to deliver the work in group, to expose it, and to carry out at least one of the two individual activities.

Activities must always be delivered through the platform within the established period. The delay in delivery will be penalized in the final qualification of the work at the rate of 1 point less for each hour that exceeds the established term.

METHODOLOGY:

The subject is face-to-face and combines theoretical knowledge with its implementation. Throughout the class sessions, the teacher will expose contents of the program through the use of different learning methodologies, besides carrying out group training activities to complement and put into practice the acquired knowledge. In addition, students should carry out individual activities during their personal work hours.

On the other hand, during the hours of personal work, the students will carry out, by groups, a final work of the subject that they must expose at the end of the academic period. For this, the students will have tutoring hours with the teacher in order to supervise and guide the development of the project.

Finally, it is recommended that the student dedicate each week a few hours of personal work to this subject in order to consolidate the knowledge acquired in each one of the items. This personal work will consist of a review of the theoretical aspects treated in class and complement them with the basic bibliography.
