

DIGITAL MARKETING AND E-BUSINESS

COURSE: THIRD

SEMESTER: SECOND

SUBJECT: OBLIGATORY

CREDITS: 6

LANGUAGE: ENGLISH

DOCENTE: [EVA GUNDERMANN](#)

OBJECTIVES:

The course objectives are to introduce the students to the strategies and implementation of digital marketing in an international context related to the following fields: search engine optimization (SEO), Google ads or SEM and email marketing. The main tools, metrics and platforms will be explained. The graduates will be presented with case studies that they will solve using digital marketing strategies.

The students will learn about the SWOT of a company and to identify the weaknesses and strengths of a project. They will be shown how to relate digital marketing strategies to tactical actions in the overall framework of the company's strategy. They will be introduced to methods and sampling of market research as well as content management and sales platforms.

The international laws and their impact on ecommerce companies will be shown. The students will study international treaties and their implications for e-businesses. The main processes of order management and payment will be shown to them. The students will study the digital marketing mix with the different channels and how to manage them as well as the budget. They will design a digital marketing plan including all the digital marketing channels.

EVALUATION SYSTEM:

Two partial exams will be carried out with 25% of the grade each one of them, which will be necessary to approve to do average.

The continuous evaluation will be based on five activities related to the contents of the agenda.

Evaluation system	Value (%)
5 class presentations	40
Oral participation in class	10
Partial exam 1	25
Partial exam 2	25

In case of failing the first second or both exam partials, the student will be able to attend to the recovery exam only if he/she has developed the continuous evaluation (it means deliver all the activities). If not, the student will fail the subject.

The teacher will consider the progression and continuous evaluation of the student.

METHODOLOGY:

The subject combines the theoretical knowledges with the practice. Along the sessions, the professor will expose contents of the program using different methodologies of learning, in addition to effective formative activities in group to complement the knowledges purchased. Likewise, the students will have to make individual activities.

On the other hand, during the hours of personal work, the students will make by groups a final work of the subject that will have to expose at the end of the subject. Finally, it's recommended to the student that works periodically into the subject, to consolidate the knowledges purchased in the subject. This personal work will consist in making a review of the theoretical appearances treaties in class and complement them with the basic bibliography.
