METHODOLOGY:

This is a classroom subject that combines theoretical knowledge with its implementation. Throughout the class sessions, the teacher will expose contents of the program through the use of different learning methodologies, in addition to performing group training activities to complement and put into practice the knowledge acquired. In addition, students should carry out individual activities during their personal work hours (activities I and II; other classroom activities).

On the other hand, during the hours of personal work, the students will make a final work of the subject (activity III) that they will have to exhibit at the end of the academic period. For this, the students will have tutoring hours with the teacher in order to supervise and guide the development of the project.

Finally, it is recommended that the student dedicate each week a few hours of personal work to this subject in order to consolidate the knowledge acquired. This personal work will consist of a review of the theoretical aspects treated in class and to complement them with the basic bibliography.
